

Are you sitting with a tight deadline and suddenly your client wants you to add a particle animation and a sweeping light effect? We got the solution for you.

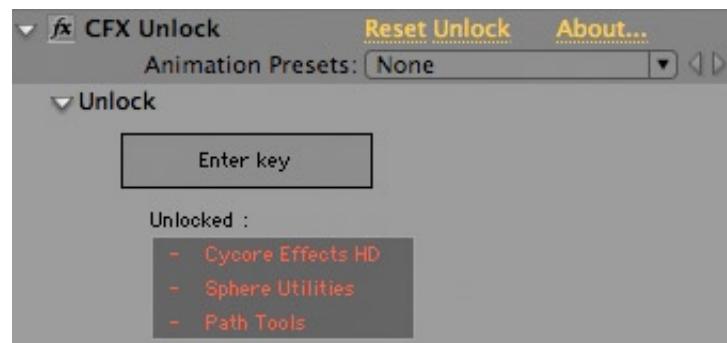

Go to www.cycorefx.com and purchase CycoreFX HD and have them ready to use within minutes. When ordering, have your credit card ready.

- Secure online credit card verification and delivery. Your payment is secured by TellusPay Payment Gateway. TellusPay uses industry standard Secure Sockets Layer (SSL) server software, 3-D Secure technology and Card Code Verification.

To unlock the plug-ins:

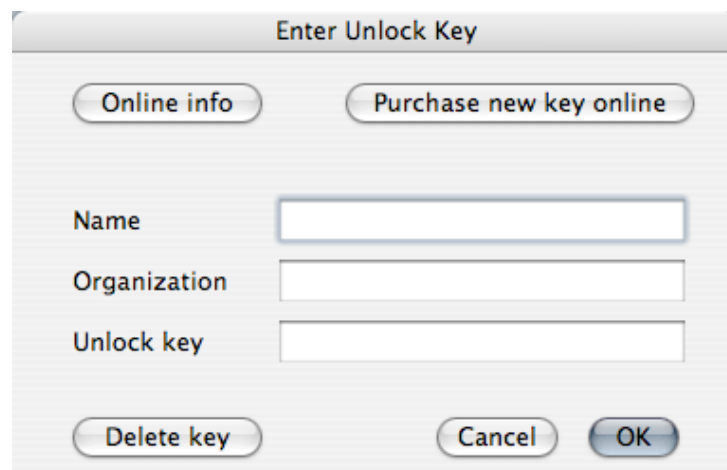

- Launch Adobe After Effects and apply Effects -> Utility -> CFX Unlock to any layer.
- In the Effects Control Viewer, click the “Enter key” button (see illustration below).

Note. Clicking on the effect package names in red (locked) will take you to the respective product page at cycorefx.com.

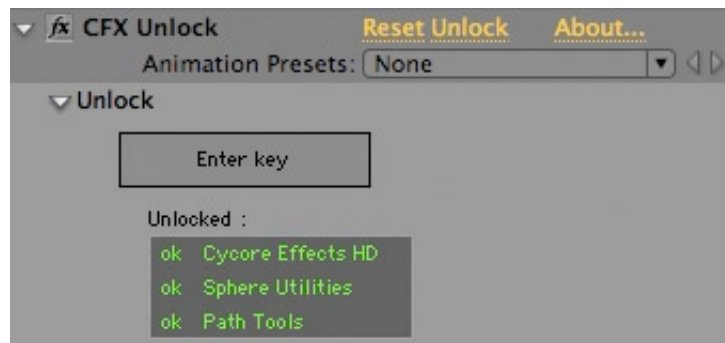

- Enter your name, organization and unlock key and click “OK” (see illustration below).

Note. Both the name and organization fields requires a minimum of four characters. For example Bob and VTV won't work.

- Next you will be asked to register your key online. Registering only takes an instant and is required to retrieve a lost key.
- Quit and relaunch Adobe After Effects.
- When Adobe After Effects is up and running again, apply Effects -> Utility -> CFX Unlock to any layer.
- CycoreFX packages that have been unlocked will now be green (see illustration below).

Note. Clicking on the effect package names in green (unlocked) allows for viewing unlocked key information.

It's as simple as that. Hope to see you there!
